MOVERBar

Mobile Bar Units

All units incorporate a heavy gauge stainless steel chassis with double ball race swivel castors having 100mm diameter bonded rubber tyres and brakes on the server's side for stability when serving. A stainless steel BARFrame structure is bolted to the chassis to provide support and fixings for the customer's choice of ServaClean fitments, Counter Top and decorative Front and Side Panelling.

MOVERBar is a modular system offering numerous different combinations of fitments, planned to meet each customer's specific operating requirements. The units can be supplied ready for cladding with the customer's own materials, or complete with one of ServaClean's standard finishes.

This leaflet illustrates a small selection of the most popular modules and standard finishes. Tell us your operating needs and we'll plan a 'MOVERBar' to do exactly what you want it to do.

Bottles

- Cooler Cabinet with wine bottle shelves.
- Worksurface with Chopping Board.
- Hygienic glassware storage.

Backfitting Unit

- Safe and hygienic glassware storage.
