Waste Management Projects

DEL MAR Limassol

Project in progress

Limassol Del Mar is a world-class Seafront Development, with two adjoining Towers of 12 and 18 floors each and a third Tower of 28 floors just next. Situated in the most desirable coastal sea front line, this prestigious Project includes a selection of luxury apartments, 21 premium shops, 10 food and beverage outlets and 5-star leisure facilities!

- **Yianni Hospitality Concepts Ltd** undertook the entire Waste Management process of the project, by designing first the entire waste management Flow Chart and installing the most innovative Technology of Waste Handling for High Buildings. Each Tower has its own Waste Management System based on the State of Art technology of the " 4 MATIC CAROUSEL". The tenant of each floor can dispose the right waste fraction, by choosing the right button (Paper, PMD, Bio-waste or Mixed household) on the Control Panel of the

door. The Carousel at the basement which carries 4 pcs of 660 litter bins, rotates then accordingly with the right bin stopping right below the Shaft line to accept the right waste fraction. As such our company is currently installing 3 x “4MATIC CAROUSEL” Systems, one for each tower.

- These systems include also an Automatic washing system for cleaning and Sanitizing the pipeline and a ventilation system to minimize odors.
- The system is fully compatible with the current European legislation of SORTING WASTE AT SOURCE! Projects of any size or standards, will be confronted by the law if not meeting the aforementioned legislation.

360 TOWER NICOSIA

YIANNI

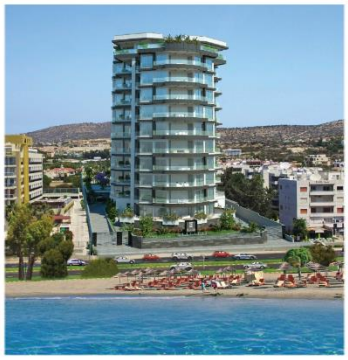
New project

The 34 floors, **“360 tower building”,** is the tallest Tower in Nicosia, serving High End residential customers with a Commercial center on the ground floor / street level.

- **Yianni Hospitality Concepts Ltd,** was awarded the entire Waste Management process, by designing and installing the most innovative Technology of Waste Handling from High Buildings, with the automatic “4 MATIC CAROUSEL” system, incorporating a S/S waste pipe line with doors at each floor and a 4 bin Carousel at the first basement. The tenant of each floor can dispose the right waste fraction by choosing the right button on the control panel of the door. The Carousel rotates and the right bin goes right below the pipe line.

- The Carousel accommodates 4 pcs, 660 litter bins, with 3 waste options for recycling, PMD, PAPER, RESIDENTIAL.
- The system includes also an Automatic washing system for cleaning and Sanitizing the pipeline.

The Address



Project in progress

The Address is a modern styled hi-rise apartment building, covered in marble, sitting opposite Limassol's highly acclaimed blue flag beach. Twenty-eight spacious apartments and two 3-bedroom penthouses with private pools, roof gardens, gym, sauna and other more facilities are arranged over 11 floors!

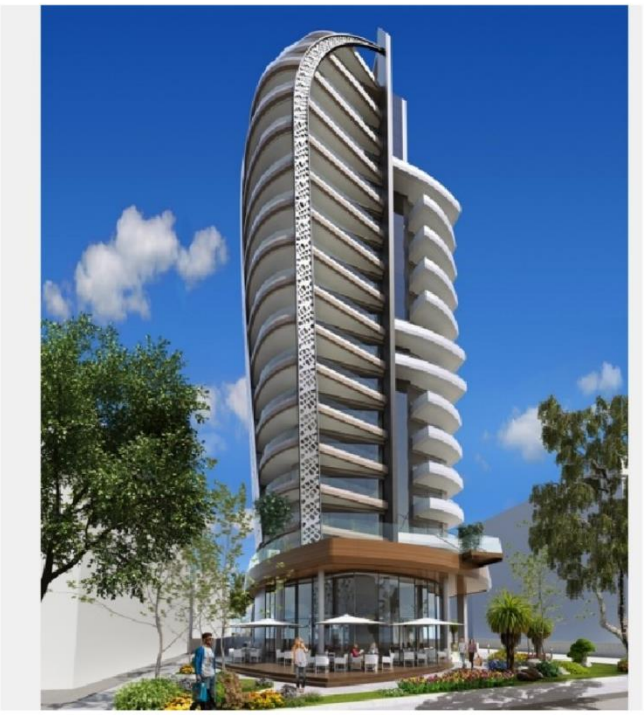
- **Yianni Hospitality Concepts Ltd** was awarded with the entire Waste Management process of the project, by designing first the entire waste management Flow Chart and installing the most innovative Technology of

Waste Handling for High Buildings. On The Address building we will install the “ROTATING END” Waste Management Technology where-by the tenant of each floor can dispose the right waste fraction, by choosing the right button (Recycle or Landfill), on the Control Panel of the door. The “Rotating End” at the basement, rotates then accordingly in the “waste room” and positions itself above the 1 of 2, 1100 litter bins, in order to place the garbage at the right bin.

- The system includes also an Automatic washing system for Cleaning and Sanitizing the pipeline.
- Additionally, the system is fully compatible with the current European legislation of SORTING WASTE AT SOURCE! Projects of any size or standards, will be confronted by the law if not meeting the aforementioned legislation.

The ARC-SHIP-Limassol Project

YIANNI®
hospitality concepts



New Project

Inspired by the waves of the sea and the curves of the windblown sails, the Arc-ship is a unique project on the Limassol coast. It consists of a 17-level tower with 22 apartments, spa, gym, pool and other facilities.

- **Yianni Hospitality Concepts Ltd** undertook the entire Waste Management process of the project, by designing first the entire waste management Flow Chart and installing the most innovative Technology of Waste Handling for High Buildings. The ARC-SHIP has adopted our “ROTATING END” Waste Management Innovative Technology where-by the tenant of each floor can dispose the right waste fraction, by choosing the right button (Recycle or Landfill), on the Control Panel of the door. The “rotating end” at the basement rotates then accordingly in the “waste room” and positions itself above the 1 of 2, 660 litter bins, in order to place the garbage at the right bin.
- The system includes also an Automatic washing system for cleaning and Sanitizing the pipeline.
- Additionally, the system is fully compatible with the current European legislation of SORTING WASTE AT SOURCE! Projects of any size or standards, will be confronted by the law if not meeting the aforementioned legislation.
